

Custom GSM/GPS tracker Call Center

Coastal Marine - Office - Hotel - Transport - Personal security - Material location

Customized GSM/ GPS tracker Call Center for receiving information from different brand of GSM/GPS trackers and redirecting via spoken text, SMS, email, FTP or Ethernet port. Reporting can be send the same way.

The design of the display as the alarms at certain locations or the 'baby phone' function are easily added in the Windows Visual Studio environment (Windows & CE).

For monitoring and controlling remote machines, vehicles or other objects but also practical for the hectic family life. Only a glance at the screen let us know where grandma and the kids are, that the house has not been opened, the car is in the parking, the yacht in the marina and the partner is playing his/her favourite sport. In case of emergency they all can immediately reach you. Even the house, the yacht or the car are able to send you a message. if something is wrong.

The GSM/ GPS tracker Call Center can also support hospitals, doctors, specialists, singles and families with sick, elderly or handicapt relatives.

Features:

- Automatic caal center with SMS, email, FTP, Ethernet and voice communication
- Programmable for most GPS/GSM trackers.
- Unlimited GPS/GSM trackers
- Simple configuration of geo-fence, speed, low battery and other alarm options.
- Available as compact and portable Windows CE system with 7, 10 or 15" colour touch screen or Windows desktop application..
- With options like tracking, logging, one button location request, automatic SMS or email warnings and reporting.
- Can be connected to existing smart domotica or alarms systems.
- Different map options including marine.

Give us a call for available GSM/GPS trackers.
